Notes - Generation estimates are based on Nuclear Regulatory Commission (NRC) Monthly Operating Reports obtained through the Institute of Nuclear Power Operations and Energy Information Administration (EIA) 906 Forms. Capacity figures from the EIA are the Net Summer Capacities reported in the 860 Form. Capacity factors are calculated using EIA capacity and generation data, and NRC generation data.

Outage duration and start and end dates are only estimates based on publicly available data from the NRC. Numbers may vary from published press releases. Outage data current as of March 24, 2008.

Nuclear Performance is produced monthly by the Nuclear Energy Institute's  
Policy Development Division.
