475,000 direct and secondary full-time jobs provided by America’s nuclear industry

Nuclear worker salaries are 20% higher on average than other electricity sources.

There are 97 reactors nationwide and each provides 500 to 1,000 jobs.

Building a nuclear reactor employs up to 3,500 workers at peak construction.

66 jobs are created in the local community for every 100 nuclear power plant jobs.

Nuclear plants are often built in rural areas.

Nearly 1 in 4 nuclear power plant employees are veterans.
